

FISO DOOR

SS Series Stainless Steel Doors and Frames

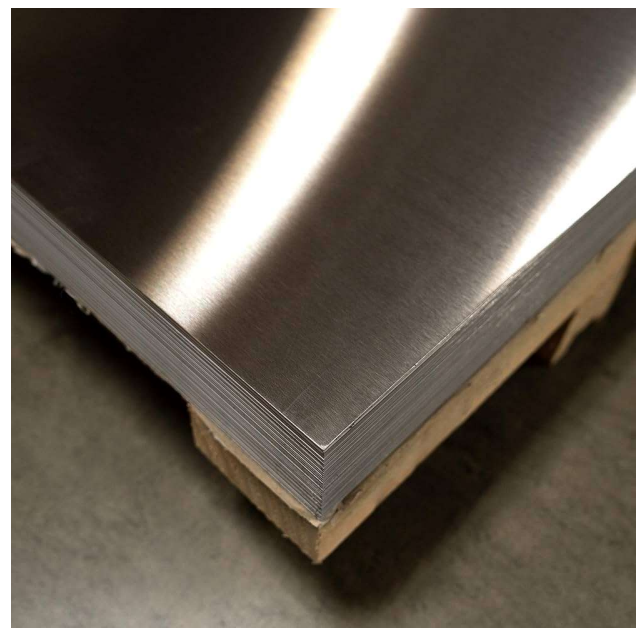

Stainless Steel Benefits:

- ◆ Premium, clean look
- ◆ Extended lifespan
- ◆ Highly customizable
- ◆ Maximum rust prevention
- ◆ Effortless maintenance

FISO Door Stainless Steel Solutions

FISO Door offers a premium line of 304 and 316 alloy stainless steel doors and frames, engineered for maximum durability and corrosion resistance. Utilizing epoxy-glued internal stiffeners for a flawless, weld-free finish, our doors are built to withstand the harshest environments—from sterile laboratories and food processing plants to high-end architectural lobbies. Combining industry-leading performance with custom sizes, finishes, and configurations, FISO Door delivers the perfect blend of strength and style for any project.

SPECIFICATIONS

SS Series Stainless Steel Doors and Frames

Door Features

1. Precision welding for a smooth, seamless stainless steel surface
2. Stainless steel thickness up to 14 gauge
3. Stainless steel stiffened available
4. Exceptional corrosion resistance - 100% stainless steel

Technical Specifications

Material	18 gauge (1.2mm) Stainless Steel 304 2B/ 304 #4/ 316 (20/16/14 gauge available)
Durability	Stainless steel offer unparalleled, lifelong durability through high impact resistance and an inherent, self-healing passive layer that eliminates the risk of rust, paint degradation, and costly maintenance even in the harshest environments
Door Size	Maximum Width 54", Maximum Height 120".
Kerf Frame	Prepared for kerf weatherstrip (Optional)
Jamb Sizes	From 4" (101mm) up to 12 3/4" (234mm) with 1/8"(3mm) increments
Warranty	2 years
Maintenance	Requires minimal maintenance
Code Compliant	Conforms to ASTM A240 / A240M, A480 / A480M specifications

Need something shipped quickly?

FISO EXPRESS offers premium, expedited service to meet your project timeline.

Meets or Exceeds Standards for ANSI 250.4, ANSI 250.8, NAAMM / HMMA 866, SDI 100 (or SDI A250.8)

Up to 3hr Fire rating. Certified for Compliance with NFPA 80, NFPA 252, UL 10B, UL 10C

Stainless Steel Grade

Grade 304

- Excellent for general use
- More economical
- High tensile strength and formability

Grade 316

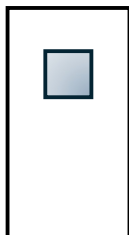

- Resists pitting from salt, chemicals, and acids
- Higher cost
- Highly durable

Vision Panel and Louver Options

FISO offers a wide range of stainless steel vision panels and louvers, available in various sizes to meet your specific needs.

Common Stainless Steel Vision Panel Size:

10" x 10"
5" x 20"
6" x 30"
22" x 28"
22" x 58"

Common Stainless Steel Louver Size:

12" x 12"
24" x 24"
